===== Disclaimer: All trademarks are property of their rightful owners. Audio material was created by me in home studio. Ease of use Overall: 5 / 5 Features: 5 / 5 Value for money: 5 / 5 Quality of  
implementation: 5 / 5 Technology (Tools, Plug-ins, Scripts): 5 / 5 Interface: 5 / 5 After trial: Tried Before Trial: Played Trial period: Less than a day Time spent: 1-2 hours Description: The electric guitar is perhaps one of  
the easiest instruments for a beginner to master. But when this guitar is played with a subtle hand technique, a percussive technique and the ability to learn to jazz over the strings, the guitar can be a very rewarding  
instrument to play. In the same way the electric violin is a great instrument for a beginner, it is also one of the most rewarding instruments to play. The Bass Section is a line module for the electric bass. Edition By :  
MhackerzOfficial VSTMIDI: N/A MIDI notes supported : N/A GUI supported: Standard, TPS's standard GUI Hardware supported: Any hardware you want. Build on Windows: Yes Compatible with Windows: Yes Comes with

Intro: TPS - Brass Section Module Brass Section is a Great addition to a brass section. It has been designed to help inspire you to get your brass section on and make any style of music sound great. This VSTi is  
completely compatible with all current hosts and Windows computers. Installation: Once you have downloaded the installer and unzipped the contents, double click on the installer and follow the instructions. To install  
TPS - Brass Section Module, you will have to put both VST files in your computer, this VSTi should be able to handle this automatically with one VST plugin This TPS - Brass Section Module has been created to provide  
you with a stripped down version of TPS - Brass Section. This VSTi is still undergoing a number of changes, and some of the higher end plugins may not work. \*Please note this has been tested on Windows Vista. This  
VSTi is intended for Windows XP users. If you still have trouble getting this to work in your system, be sure to contact me via e-mail. System Requirements: TPS - Brass Section Module VSTi works with all major  
soundcard/host VSTi's. This VSTi is compatible with all the following hosts: - Avid Pro Tools 9 or later, - Cubase 6 or later, - ProTools 8 or later, - Logic Pro 8 or later, - Reason 5.0 or later, - Notepad++ 5 or later. Note: I  
cannot guarantee that the VSTi works with other versions of these hosts. The VSTi is intended to work with a USB interface, or via audio interface. If you cannot use one of these, another option is to buy a synthesizer  
and to use that with this VSTi module. You can perform the following operations via this module: - Copy: Copy the selected parameter / track at the same time as sampling a note - Record: Record a single sample, or a  
loop of samples - Vibrato: Vibrato parameter. - Volume: Set the current Volume value Other Features: - Each plugin is self contained (you do not need to download or install any other plugins) - TPS - Brass Section  
Module features a user-friendly GUI which allows you to easily navigate through the various parameters. Click on the picture above and you will find the menu guide. - Each section is
